## Harrier 56

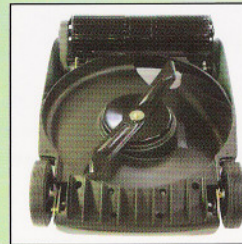

### HARRIER 56 IN DETAIL

Full width rear roller

Single lever height of cut adjustment.

ABS Underdeck liner and front fins

Friction disc crankshaft protector

# Harrier 56

Features and benefits

## Harrier 56 Variable Speed Auto-drive

- Split ribbed rear roller with differential for superior traction, easy turning and a perfect striped finish
- Tough ABS polymer underdeck liner for enhanced cut and collect performance and easy cleaning
- Cutting deck extends beyond wheelbase for border trimming
- Aluminium deck gives corrosion resistance, high durability and long life
- Variable ground speed to suit different conditions and operator preferences (1.5 - 3mph)
- Built with Briggs and Stratton engines for reliability, easy starting and low emissions
- Ergonomic controls offering superior comfort and ease of use
- Fail safe OPC (operator presence control) system
- Folding handlebar for compact storage
- Friction disc protects the engine crankshaft against accidental bending through blade impact damage
- Can be used without collection bag as a rear discharge mower
- Full width large capacity fabric grassbag with hinged flap for easier emptying
- Smooth running long life ball bearings in front wheels
- Fins at front of deck to give improved collection performance particularly at low cut heights
- Counter balanced single lever height of cut to give light and easy selection of cutting height
