

Golf Course Maintenance

The Equipment You Need
For the Results You Want

SEAGO
INTERNATIONAL, INC.

Allen Hover
Mower

Atom Golf
Bunker Edger

Hayter Harrier
Striping Mower

Seago is the exclusive U.S. distributor for Allen Hover Mowers, chosen by more golf course superintendents than any other brand. Allen's Honda-powered mowers deliver exceptional results, even in the toughest grass conditions – and they last twice as long as other brands. Allen Hover Mowers are available in 16", 18" and 21" cutting widths.

The Atom Golf Bunker Edger safely and quickly delivers a sharp, professional edge to almost any style bunker. With its powerful, commercial-grade, full-crank engine and 17" blade, this edger trims even heavily overgrown bunkers in just one pass. It will also sever grass runners to a 7" cutting depth. The task-specific Atom Golf Bunker Edger is the fastest and safest way to edge golf course bunkers.

The Hayter Harrier Striping Mower is the easiest way to achieve a perfect striped finish every time. The split rear roller has an internal differential for easy turning and is ribbed for superior traction, and a single counter-balanced lever adjusts cut height. The tough polymer underdeck liner ensures enhanced cut and collection performance and makes cleaning easy. The cutting deck extends beyond the wheel-base for border trimming.

For nearly three decades, Seago International Inc. has provided a North and South American distribution network for specialized turf-maintenance equipment selected from the international marketplace. From its headquarters in Hickory, North Carolina, Seago directs more than a hundred dealers distributing superior equipment made by leading international manufacturers. Golf course superintendents and other turf professionals throughout the Americas know they can depend on Seago to provide exceptional equipment built to the highest standards. To learn how our equipment can help improve the quality of your golf course, call for detailed brochures or visit SeagoInternational.com for videos of our equipment in action.

Atom Professional
Cart Path Edger

The incredibly safe and maneuverable Atom Professional Cart Path Edger is the fastest walk-behind edger on the market – and the only upright shaft-driven edger in the world. This durable, commercial-grade edger is 90 percent faster than traditional edgers, and with its patented overlapping four-blade cutting system and powerful engine, it tackles the most overgrown areas in a single pass.

Spyker
Spreaders

Spyker builds the finest spreaders in the industry, whether you need a walk-behind, tow-behind, vehicle-mounted or self-propelled model. With one-piece frames, lifetime-warranted enclosed gears and many patented features, these spreaders are built to last. Spyker also offers innovative accessories for multitasking your spreader to maximize its uses and your investment. All Spyker spreaders and accessories are available through Seago.

Atom
Rotary Tillers

The Atom Rotary Tiller is so innovative that it won a gold medal at the prestigious International Inventions & New Technology Convention. With a heavy-duty, all-bearing drive giving maximum torque to the tines, even hard ground can be turned faster and with less effort. The Atom tiller is available in four models, including an extra-wide, 6-tine model that tills 50 percent faster.
